

**International Sustainable Smart Farming Seminar
Dalhousie Agricultural Campus, Extended Learning
March 15 & 16, 2018
Agricultural Campus, Bible Hill, NS**

Registration fee: \$60 (includes access to entire program, ticket to banquet, lunch and all coffee breaks).

Join Dalhousie Agricultural Campus' Precision Agriculture team as they host a two-day seminar on smart farming technologies on March 15 & 16, 2018. Workshop participants will include individuals from government, high value crop producers, processors, academia, private agricultural machinery companies, engineers and non-governmental organizations that work on or are interested in the sustainable development and adoption of smart precision agricultural technologies. All are welcome to attend.
